Synopsis

An elderly man living in present-day Los Angeles is forced to revisit the history he has spent years trying to deny-the tale of a young frontiersman who comes to New York City in 1901 and quickly finds a job digging the first subway tunnels. He meets a beautiful mathematical prodigy who speaks of the vanished Kingdom of Ohio. Against the electric, mazelike streets and tunnels of New York City at the beginning of the mechanical age, the couple will find themselves involved with Nikola Tesla, Thomas Edison, J.P. Morgan-and wrestling with the nature of history, technology, and the unfolding of time itself...

What people say about this book

Ebook Tops Reader, "Marvelous. I was captivated on the first page. The author pulled me right into the story of early settlement in the Ohio territory. The foot notes and references seemed absolutely authentic. I have lived in the Toledo area for decades and his detailed descriptions of the early Ohio wilderness almost had be believing that I was reading a work of non-fiction rather than a novel.This is the best alternate universe story that I have ever read. I have given it as a gift to friends and family and am eagerly looking forward additional works by this incredibly gifted writer."
