Synopsis

What would happen if you asked 20 psychics the same question? What if you asked about their invisible information sources, about life, love or how the Universe works? How does information come to them? Are psychic abilities real? For this Project, more than 20 psychics, intuitives, readers and healers were asked about their life and their work. Their answers are fascinating and reveal a universe of energetic connections. Have you wondered if you are psychic? Read about the psychics' experiences and see if you can identify with what they have gone through. Perhaps you remember seeing ghosts and fairies as a child. Some of the psychics have had similar experiences. Perhaps you just knew things you had no logical way of knowing. It's called Claircognizance. The Book is written in a "Question and Answer" format so you can go right to the areas which interest you. In many cases, multiple psychics answer the same question so you can see a range of viewpoints. The first section of the book is an "Introduction to the Project, the Words and the Psychics." It includes a Psychic Skills Checklist which can help you determine which abilities are yours. Short summaries of each of the psychics can be found in the book so you can get a feel for who they are and what they do. Each psychic works in a unique way. The second section is all about "Life as a Psychic" and answers questions such as how people figured out that they were psychic and how being psychic impacts their lives. Section Three is all about "Readings, Healings and Energy Work." Discover the Spirit Guides and other invisible information sources which answer our questions. Find out how information comes to psychics. See how can you find a reliable psychic reader and how can you can get your best reading. Section Four is about "The Wheel of Incarnation." In this section, psychics share what they know about life, death, and the afterlife. Learn about reincarnation, life purpose, and why you are here. Section Five is about "The Future." Can you develop your own abilities? What will happen when the energies which came to Earth in 2012 fully open? When you open this book, you open a world of ideas which can help you live a more fulfilling life.

What people say about this book

michele mullaly, "Five Stars. I already have bought this book but Amazon won't show it as purchased"

Clarence, "insight and love into this book. Very impressed with this book. It answers a lot of questions and gives much needed information about these gifted individuals. Gail Kushner put a lot of work, passion, insight and love into this book. It was and is a pleasure to read, absorb, be aware of and share this knowledge with other individuals."

Ebook Tops Reader, "This book helped me in a criminal case.. I met Gail at an IONS meeting - Institute of Noetic Science that was started by Edgar Mitchell who walked on the moon and felt an overpowering oneness with everything and everyone. He quit NASA and started IONS with off-beat scientist worldwide. There are currently hundreds of chapters of this now highly respected science. Gail talked about her book which was just out at the time, and I purchased one from her not knowing what to expect. It turned out to be an outstanding description of various types of psychics, plus, interviews with psychics all over the U.S. with contact information. Each psychic seems to have unique and different gifts as well as different ways of channeling messages. The psychics presented in Gail's book are spiritual, vetted, and receptive to helping others for a modest fee. I found the help of the psychics I contacted over a criminal matter to be a tremendous help. This book is a guideline to finding the right psychic for what is needed and an excellent guide in defining what a psychic is and is not."

GH, "This book opened my mind. I've always been skeptical about the subject of psychics, but after reading this book, I am much more open-minded about it. I read it while spending a weekend at a cabin up in the mountains, and it was such an easy read that I almost finished the whole thing in one night. It has a very matter-of-fact, journalistic style to it that is based almost entirely on interviews with people who are professional psychics. It was very interesting to hear their perspective on what they do, in their own words. I doubt there is any other book out there like this one. If you're at all interested in the topic and want to learn more, I'd say this is the book to read."
