Synopsis

The world can be a dangerous place. Over time, animals evolved many natural defenses to help them survive. Combat during wartime is extremely dangerous. Why not look to nature to find the best defenses for soldiers on the battlefield? Military forces have done just that for hundreds of years. From the armor of medieval knights to tomorrow's advanced camouflage, take a look at how military technology often mimics the traits of animals to help protect soldiers in combat. Then be sure to catch the other amazing titles in the Beasts and the Battlefield series.

Sort review

Book Description1. A high-interest way to show how the natural world inspires technology. 2. Useful for hi-lo readers in middle school reading at a third or fourth grade level. 3. High-interest topic ties to Science, Technology, Engineering, Art, and Math (STEAM) curriculum. 4. Provides examples of historical, modern, and future uses of animal-inspired technology in the military forces. --This text refers to the paperback edition.
